## MRL Elevator

- ▶ The Machine Roomless elevator save construction space to a large extent.
- ▶ The permanent magnet synchronous motored gearless machines have unapproachable superiority to the traction motor and save roughly 35% of energy consumption featuring excellent reliability and durability, they have a compact design, light weight and operate quietly and there is no need for lubrication.
- ▶ Such elevator have become more and more popular because they run at low noise and are energy saving and easily maintainable and make the building look more aesthetically pleasing.
- ▶ MRL have broken through the prerequisite for machine rooms, providing limitless possibilities of creation for the limited space of modern construction.
- ▶ Features : Longer functional life, Requires low maintenance.
- ▶ The advantage of MRL is much appreciated by the civil engineers, architects and users.
